

作业一：网页前端初探文档

1511388 周睿

一、 针对任意网页，调研其不同方式请求，至少包括 get、post 请求，写出或截图其请求及相应数据包

1.沪江网校首页

类型：GET

```
action: Login
callback: jQuery18303240670497836615_1499437855195
userName: nf321123
password: 900150983cd24fb0d6963f7d28e17f72
imgcode:
loginType: normal
```

数据包：-----

2.计控学院网站

The screenshot shows the homepage of the Nankai University College of Computer and Control Engineering. The website has a blue header with navigation links: 首页, 学院概况, 党政领导, 机构设置, 师资队伍, 学科建设, 院长信箱, and English. Below the header is a blue bar with links for 本科生培养, 研究生培养, 学生风采, and 教育教学管理. The main content area includes a '最新动态' (Latest News) section with several news items, a '学院公告' (College Announcements) section, and a '学生之窗' (Student Window) section. A Chrome DevTools Network tab is open, showing a POST request to http://cc.nankai.edu.cn/homepage/index.aspx with a status code of 200 OK. The request headers are visible, and the response headers are also shown.

类型：POST

数据包：

```
txtUserID: abc
txtPasswd: 1
imgbtnLogin.x: 40
imgbtnLogin.y: 8
```

二、针对任意网页，使用 JQuery，能够出发某一事件，写出至少三条语句，截图响应前后不同的状态

1. 隐藏所有 <p> 元素

 百度一下

```
Elements Console Sources Network Performance Memory Application Security Audits
top Filter Info
> $(".p").hide()
< ▶ (3) [p, p#lh, p#cp, prevObject: init(1), context: document, selector: "p"]
>
```

2. 阻止对表单的提交

安全 | https://www.baidu.com/s?ie=utf-8&t=3&rsrv_bp=1&rsrv_idx=1&tn=baidu&wd=aa&oq=aa&rsrv_pq=tdU52U2bU0U1bU02&rsrv_t=eeditKfCk421KqkKP/B%2

应用 百度一下, 你就知道 登录界面

Baidu 百度
